10 Tips
to get the most from your Video Security DVR

Optimizing your DVR security system should not stop with the selection of your recording device … Here are 10 tips to ensure that you get the most out of the DVR you purchase:

1. Choose the right recording equipment. Select a DVR with the features that your application requires, such as number of cameras to be recorded, storage capacity, Internet monitoring, USB export, DVD Burning, motion detection, recording speed, and resolution.

2. Set the right frame rate. This will maximize your potential recording time.

3. Keep your DVR recording with the overwrite feature. This will ensure that you have continual archive of video footage.

4. Turn your Security DVR into a full time security guard. Use alarm inputs, trigger outputs, and motion detection to alert you should something occur.

5. Don't let conversations go unheard. Most DVRs have audio recording capabilities, allowing you to add a high quality mic or leverage the microphones built into your cameras to capture a second dimension of the crime.

6. Make your Security DVR tamper proof. Use password protection, conceal the DVR and/or use a security DVR lock box to prevent unauthorized access.

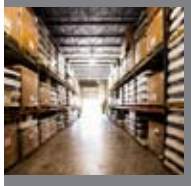
7. Protect your investment from surges & failures. Prevent recording interruptions from intentional and unintentional power outages with a UPS (uninterruptible power supply).

8. Access & manage your Video Security DVR virtually anywhere. Take advantage of this powerful feature. We recommend a high speed internet connection for the best remote monitoring experience.

9. Be prepared to off load your video (and audio). Caught on tape, now what? Keep DVD's and CD's available for quick archiving and sharing of evidence with law enforcement.

10. Don't miss the important details. Select a monitor with sufficient resolution to provide the picture quality you desire.

IR Cameras Capture Clear Video in Total Darkness



Infrared (IR) cameras provide 24 hour surveillance without the need for expensive, energy consuming visible illumination. They are commonly used indoors and out, and are typically designed to withstand the harshest weather environments and the most determined vandals. When choosing an IR camera, we highly recommend that you consider a unit with at least 20% more infrared range than your targeted area, and that you select a camera that features a vari-focal lens so that you can customize your field of view.

Great for:

- Non-lighted entry & exit points
- High-value interior areas, such as server rooms, safes, warehouses
- Any area with variable lighting conditions
- Residential yards & driveways

Vandal/Weatherproof IR Zoom Camera

With advanced features inside and out, this long range infrared camera is truly a benchmark for the video security industry.

Comes swivel mounting bracket, instructions, 1 year warranty and 30 day MBG.

Dome Cameras Offer Inconspicuous Security

Dome cameras are the perfect choice for businesses and homes that require a highly effective but less conspicuous security solution. Dome cameras can be used for both indoor or outdoor applications, offer a wide range of features & benefits, and can be mounted both vertically and horizontally – all without the need for additional brackets or enclosures. Many offer a "smoked" dome option, so that a criminal cannot determine the area being watched by the camera - a feature unique to dome cameras.

Great for:
- Public areas, such as schools and restaurants
- Short range applications, such as elevators
- Vandal prone areas, such as subways
- High-risk areas, such as casinos

B/W and Color Dome Cameras

These dome cameras work great on ceilings or walls with a fully adjustable tilt and swivel for total flexibility. We've got a camera to meet your needs, from simple indoor installations to the most demanding applications, including harsh weather installations, vandalism prone areas at schools, ATM's and correctional facilities.

CAMERA vs. BAT - WHO WINS?

Check out the video online at: www.supercircuits.com/products/CD25IR

CS-Mount Cameras are an Effective Criminal Deterrent

CS-Mount style cameras are what most people think of when they hear the term "Security Camera". They are easily identifiable, and act as an effective criminal deterrent. CS-mount cameras offer a wide range of capabilities, as they can be used with hundreds of different sized lenses, a wide array of mounting brackets, and a wide selection of enclosures ranging from weather-proof, climate controlled, semi-covert and vandal-proof.

Great for:

- Businesses with drop tile ceilings
- Parking lots
- Targeted areas of activity, such as cash registers
- Applications requiring integrated audio surveillance

Super Low Light Cameras

» Sony Ex-View chipset

PLATINUM High Performance Cameras

BUILT-IN TWISTED PAIR TRANSCEIVER SENDS VIDEO UP TO 2,000 FEET!

The PC33C has led the market as a top-of-the-line video security camera. So how could we make it better? We began by increasing the resolution and the light sensitivity to 0.01 lux. Then, we added the ability to send video over 2,000' using standard Cat5 cable and the built-in BNC video output. Ready To Install (RTI) cameras come with a pre-installed, pre-adjusted 2-12mm manual iris lens.

Super High-Res Day/Night Camera

600 LINES OF RESOLUTION B/W & 520 RES IN COLOR!

» Sony Ex-View chipset delivers 600 lines night mode and 520 lines day mode
» 0.01 low lux light capability
» Accepts any CS-mount lens
» High sensitivity microphone and built-in audio circuit
» Operates on 12 / 24 volts

Comes with instructions, 1 year warranty and 30 day MBG. Lens not included.

Item Descriptions	Part #	Lux	Res	Price
High Resolution D/N Color Camera	PC900DNHR	0.01	600/520	$149.99

High Res DNR Color Camera

BUILT-IN DIGITAL NOISE REDUCTION FOR CRYSTAL CLEAR IMAGES

» ⅓" Sony Super HAD CCD provides 550 lines resolution with 0.01 lux
» Digital Noise Reduction reduces the amount of electronic noise in captured video giving you superior image quality
» Operates on 12 or 24 volts and comes with on screen display and adjustments

Comes with instructions, 1 year warranty and 30 day MBG. Lens not included.

Item Descriptions	Part #	Lux	Res	Price
High Res Color DNR Camera	PC37NR	0.01	550	~~$189.99~~ $169.99

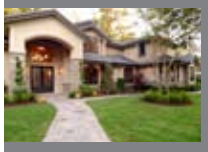
NEW! Super High-Resolution, Wide Dynamic Range Color Camera

» Sony ⅓" chipset produces 600 color lines and 700 lines B/W
» 0.0003 lux low light rating
» Include super wide dynamic range for crystal clear images in even the harshest front or back lighting conditions
» True day night cut filter
» 3-D digital noise filter eliminates any "snowing" of image quality

Comes with instructions, 1 year warranty, and 30 day MBG. Lens not included.

Item Descriptions	Part #	Lux	Res	Price
Wide Dynamic Color CCD Camera	PC920HR	0.0003	600/700	$299.99

Bullet Cameras offer Discreet Surveillance



Bullet style cameras are small and unobtrusive, but aren't short on capability. Models feature a wide range of sizes, light sensitivity, resolution, and many offer built-in infrared capabilities for viewing in complete darkness. Bullet cameras are most commonly used for outdoor applications, as most come in a weather-resistant housing by design. However, they are perfectly suited for indoor use, and often used to for more discreet applications.

Great for:
- Business entry & exit ways
- Outdoor longer range covert applications (over 50')
- Exterior residential surveillance

NEW! PLATINUM Weatherproof Bullet Camera

Our weatherproof, fixed bullet video security cameras fit unobtrusively into almost any environment. Designed to save you time and money! The weatherproof cameras come with a Sony ⅓" Super HAD Color CCD chipset.
Comes with easy connection instructions, 1 year warranty and 30 day MBG.

Item Description	Part #	Lux	Res	Price
Platinum Weatherproof Bullet Cam	PC50WR 380 TVL	0.5	380	$64.99
Platinum Weatherproof Bullet Cam	PC50HR 480 TVL	0.5	480	$89.99
Platinum Weatherproof Bullet Cam	PC50HREX 550 TVL	0.5	550	$99.99

NEW! PLATINUM High Performance Zoom Camera

- Sony ¼" Super HAD High Resolution Color CCD
- Premium ADL 3.8-10mm varifocal, auto-iris zoom lens
- 10x optical / 8x digital zoom
- True day/night improves low light sensitivity
- Advanced features include DNR, OSD, and DSS.
- Weatherproof IP66 rated

Comes with built-in 2-9 auto iris zoom lens, 1 year warranty and 30 day MBG.

Item Description	Part #	Lux	Res	Lens	Price
Color Zoom Camera	PC53EXZ	0.7	500	3.8-10mm	$329.99
Zoom Camera	PC54EXZ	0.03	560	3.8-10mm	$329.99

High Resolution Day/Night Weatherproof Camera

- Sony Ex-View chipset
- 12v DC at 110mA

This outdoor day/night high resolution camera combines the necessary color imaging during the day, then automatically turns to black & white mode during low light conditions to allow the needed light in from additional infrared illuminators.
Comes with instructions, 1 year warranty and 30 day MBG.

Item Description	Part #	Lux	Res	Lens	Price
High Res D/N Cam	PC333HR	0.05	480	3.6mm	$139.99

PTZ Cameras Offer the Ultimate in Efficiency

PTZ (or Pan/Tilt/Zoom) cameras offer the ultimate in security efficiency – allowing you to surveil larger areas with a single camera. They have long been popular with casinos and high security facilities, but have become more popular for small business and home use given their increasing affordability. PTZ cameras are easily programmed to perform a virtual patrol of a facility, and can be triggered by common alarm sensors to instantly focus on entry-ways, hallways and high value items. They can also be controlled remotely by most digital video recorders allowing you to monitor activities from anywhere in the world.

Great for:

- High sensitive areas of activity, such as retail floors or casinos
- Wide outdoor areas, such as parking lots or grounds
- Wide indoor areas, such as a warehouse or office space

High Res Zoom Outdoor Dome

- ⅓" Sony Super HAD CCD
- Day/night operation
- Digital noise reduction
- 3-10 mm varifocal DC auto iris
- Dual power 12v/24v and extra video out
- IP66 weatherproof rated

Comes with pre-installed plug and play video/power cables, mounting base, instructions, 1 year warranty and 30 day money back guarantee.

Part #	Res	Lens	Price
CD37NR1	550/590	3-10mm	$289.99

PLATINUM High Performance Domes

ULTRA-HIGH RESOLUTION, SUPER LOW LUX DOME CAMERAS!

These high performance domes have it all – advanced Sony chipsets, ultra-high resolutions, low lux ratings, and much more! Surface & flush mount options, tri-axis, and 90 degree tilt offer complete flexibility for just about any application.

Item Description	Part #	Res	Lux	Price
Indoor Dome Camera	CD50	550	0.3	$199.99
Outdoor Vandalproof Dome Camera	CD50WR	550	0.3	$299.99
Indoor Dome IR Camera	CD50IR	550	0.3/0 IR	$299.99
Outdoor Vandalproof Dome IR Camera	CD50WRIR	550	0.3/0 IR	$329.99
Indoor Wide Dynamic Dome Camera	CD50WD	480	0.1/0.0003	$329.99
Outdoor Vandalproof Wide Dynamic Dome	CD50WRWD	480	0.1/0.0003	$369.99

- Advanced Sony chipsets
- Auto iris 3-12mm zoom lens
- Send video up to 2,000' using Cat 5
- Flush or surface mountable
- Tri-axis & 90 degree tilt
- 5 year warranty
- AC dual power input
- 12V DC / 24V

Optical Zoom Outdoor Speed Dome Camera

INDUSTRIAL PTZ WITH MOTION TRACKING AND PRESET PANNING

- The Sony Super Ex-View HAD CCD imager delivers 0.01 lux sensitivity in night mode, while providing 470 lines of resolution
- PTZ dome camera has 360° continuous rotation with a preset pan speed up to 360°/sec and a manual panning speed from 0.4° to a full 300°/sec
- Industrial outdoor security dome comes equipped with micro step and vector drive technology which allow for diagonal movement with extreme levels of precision and accuracy
- IP66 weatherproof rated speed dome camera has a super quiet design capable of producing under 60dB of operation noise even with a heater and blower

This is one of our most versatile and highest quality pan tilt zoom video cameras we've ever offered. The Sony Super Ex-View HAD CCD delivers 470 lines of resolution with a 0.01 lux low light rating. The PTZ video camera comes standard with 360 degree continuous rotation with preset pan speeds up to 360 degrees per second. This outdoor speed dome camera has an IP66 weather proof rating and is equipped with a heater and blower to ensure that your security speed dome camera works under the toughest conditions.

18x Optical Zoom Outdoor Speed Dome Camera PTZPZ7M **$999.99**
36x Optical Zoom Outdoor Speed Dome Camera PTZPZ8M **$1,399.99**

Outdoor Day/Night PTZ Security Camera

ALL THE CAPABILITIES OF AN ADVANCED SPEED DOME CAMERA & MORE!

- All metal dye cast aluminum with powder coat painting
- 360° continuous rotation with a 40° to -90° tilt range, max camera speed of 140° per sec, and 70° per sec for manual movement
- 24v AC working voltage with max 21 watt power consumption (heater, fan, defroster)
- 220 preset locations @ 0.1° accuracy, 8 privacy masks, password protection, on screen menus, movement to presets and day night setting by optional schedule, wiper, withstand wind speeds up to 90mph!

Here is an all weather outdoor camera you can depend on for years of quality service and precise reliable operation. This fast outdoor camera is proportionally controlled just like a speed dome camera using common protocols such as Pelco D, and offers features not found on cameras offered by competing products.

Outdoor D/N PTZ Camera PTZPZ6 ~~$2,499.99~~ **$2,299.99**

2009 Guinness Book World's Smallest Color Camera

NOW COMES WITH EASY MOUNTING OPTIONS!

- ¼" color CMOS chip delivers 380 lines of res
- 1.5 lux low light rating
- Pinhole 3.5mm lens
- 55° field of view
- Measures less than ⅓" square!
- 9-12V DC power @ 35mA

Easy flush and swivel mounting brackets

Comes with plug and play cables, instructions, mounting brackets, magnetic base,1 year warranty, and 30 day MBG.

Micro Color Camera with Mounting Bracket PC208-3 **$149.99**

World's Smallest Color Camera

FEATURED IN THE 2009 GUINNESS BOOK OF RECORDS!

- ¼" color CMOS chip delivers 380 lines of resolution
- 1.5 lux low light rating
- Pinhole 3.5mm lens
- 55° field of view
- Measures less than ⅓" square!
- 9-12V DC power @ 35mA

Comes with plug and play video/power cables, instructions, 1 year warranty, and 30 day MBG.

Ultra Small Color Camera PC208 **$124.99**

Super Durable Micro Cameras

SUPER TOUGH HIGH RESOLUTION MICROVIDEO CAMERAS!

These cameras are built tough in a rugged aluminum case is only 0.54" thick, making "bodycam" type concealments easy with the pinhole versions. All run off of 12v DC and consume a low 100mA.

Super High Res B/W Camera	PC229HRXP	550	0.005	3.7mm	**$279.99**

Place a Camera Anywhere!

Micro cameras provide the features of larger style cameras, such as high resolution and low light capabilities, but in a much smaller form factor – as small as 0.33" square! They are perfect for hidden video applications to see "what's really going on" with your business or home when you're not there to watch. Concealing micro cameras behind drywall, drop tile ceilings, in boxes or fixtures is simple – they can often be placed in plain view in cluttered areas without risk of detection. We recommend super cone pinhole lens [UXP] type cameras for penetrating through thicker material and flat pinhole lens [XP] type cameras for thinner material such as paper and apparel.

Great for:

- Non-permanent internal investigations
- Spot checking for customer service – "mystery shopping"
- Law Enforcement – particularly body-worn applications

Are IP Cameras Right for You? **by Keith Becker,** *Supercircuits Product Development Manager*

You don't have to look very hard to find companies claiming that IP based video security systems are the best and only way to go. Clearly there are tremendous benefits of owning an IP system, while traditional analog systems are still sufficient for many. Bottom line - you should make this decision based on your needs. Here are the key differences and benefits of each to help you decide.

The fundamental difference

The fundamental difference between an IP based and an analog system is that IP systems are truly digital. The camera takes on the role of a DVR for compression, video motion detection, and image adjustments, and transmits a fully digital stream back to your recorder. IP recording software may offer some additional features, but the camera does most of the work. Conversely, cameras used in traditional analog systems use coaxial video cable to transmit their images directly to a digital video recorder, and typically require a dedicated cable for every camera. While the video is recorded digitally, there are multiple conversions from analog to digital signals before storing, often resulting in lower image quality than IP.

When IP is necessary

IP systems offer higher image quality than analog systems, and allow you to use higher resolution megapixel cameras if needed. For enterprise level applications, you can easily expand systems as there are no physical input limitations on IP recording devices - simply add licenses to add cameras. Larger IP projects will often deliver a reduction in overall installation cost, as the cameras can operate over existing network infrastructures which eliminates costly labor of pulling thousands of feet of cabling. IP systems are also designed for multi-site management which makes remotely monitoring multiple locations easier.

When analog is sufficient

Analog systems do offer advanced features such video motion detection, email alerts, and remote monitoring capabilities, but these features are controlled by the DVR, not the cameras. There are several disadvantages to this, but primarily, you may have to purchase a more powerful DVR than needed, as the DVR must offer these advanced features for every camera connection. Additionally, there is a limit to the resolution that can be achieved with analog cameras, and you may have to use more cameras to cover higher detail areas. However, for smaller applications, there is typically a cost advantage to staying analog.

At Supercircuits we provide a complete selection of both traditional analog and IP technologies, so that we can deliver the right technology for your needs. To learn more about IP technology, check out "10 Reasons You Should Consider Using IP Technology" on the opposite page.

NEW! Vandalproof IP Dome Camera

- 540 line color / 600 line B/W Sony CCD with IR cut filter
- 0.01 lux low light support
- CS-mount auto-iris lens support
- Multi-stream 720 x 480 MPEG-4 / MJPEG video at 30fps
- PoE (5.7w) or 12v DC operation

This high-res 540 line camera features analog video output, true D/N, auto-iris lens support, audio, 12v DC or PoE power, and the ability to multi-stream 720x480 MPEG-4 or MJPEG video at 30fps. Common IP protocols are used making the camera compatible with over 90% of 3rd party NVR software on the market.

Comes with instructions, 5 year warranty, and 30 day MBG. Lens not included.

NEW! 4, 8, 16 and 32 IP Camera Systems

COMPLETE TURNKEY SOLUTIONS WITH EVERYTHING YOU NEED FOR EASY, FAST SETUP

These NEW turn-key IP video systems come complete with everything you need for professional IP video surveillance.

All systems feature our powerful network video recorder and advanced client software, allowing you simultaneously view your cameras live or review recorded video from anywhere in the world via the Internet.

Systems feature our NEW Supercircuits IP dome cameras (CD25IP) or box cameras (PC33CIPDN-4G), complete with varifocal lenses, mounting brackets, and PoE switches. The DVR system can be upgraded to accommodate additional IP or analog cameras, and can communicate with most common IP protocols available today.

Easily offload evidence to CD-ROM, USB or via your network, or save as an .AVI file for quick archival.

Includes 1 year of parts, labor, and live, US-based technical support for all hardware, plus lifetime free technical support on the surveillance software package.

DESCRIPTION	# of Cameras	PART #	CAMERA Res	CAMERA Type	AUDIO	PRICE	System Savings

	32	SY10232IP	550	Dome	No	$17,999.99	$1,999.34

All IP turnkey systems include the following:

Multiport PoE switch, 100 foot terminated CAT5 cables, easy quick start guide, warning sticker, and instruction manual. One year manufacturers warranty on all parts unless otherwise noted.

10 Reasons You Should Consider Using IP Technology

While IP cameras and recorders offer some of the latest and greatest in security technology, IP video has yet to be widely adopted. Why? The two most common reasons I hear from our customers are that it is either too expensive, or that it's just too hard to use. We will argue that neither is valid today. Additionally, IP video offers many advantages over traditional analog technology that you many fail to consider:

1. Easy to Use Can you use a computer mouse? If so, then you can use IP video. IP video systems have easy to use menus that can make first-timers look like experts.

2. Higher Resolution IP cameras are digital end to end, and use progressive scanning to make full use of camera imagers - providing up to 25% more resolution than analog cameras with similar imagers. IP is also available with Megapixel cameras, delivering super-high resolution real-time video.

3. Lower Cable Cost IP cameras can transmit video, audio, and power on a single network cable. Even better - cable is less expensive, a single cable can handle 4+ cameras, and network cable is probably already wired throughout your building. That results in significant savings.

4. Future Proof Like computer and other network devices, IP gear is easily updated for new capabilities and compatibility as technology advances.

5. Creates Efficiencies IP systems can easily alert you by sending live video to laptops or even cell phones for immediate review. This functionality can also be used for non-security applications, such as customer service, deliveries, work-flow monitoring and more.

6. Intelligence IP video systems are equipped with on-board processors to analyze events in real-time, alerting you about suspicious activity while overlooking benign matters.

7. Secure Transmissions IP video systems encrypt your data to ensure your complete privacy, eliminating the need for expensive fiber optic cable.

8. Reliable and Redundant IP systems leverage decades of technical evolution to deliver proven reliability. IP video systems can be easily set up to store video at multiple remote locations for security against disasters and theft.

9. System Integration IP video systems can easily integrate with your alarm systems, lighting, environmental and access controls. And IP video systems are increasingly compatible across manufacturers.

10. Infinite distance IP cameras can be accessed, managed and recorded from across the room or across the world via the Internet.

There is a learning curve to installing and operating IP video – which is likely to discourage many potential users from taking the initial leap IP. But as prices continue to become more competitive, we highly recommend that you take the time to learn this new technology, and start to leverage the many advantages of using IP.

We integrate with the following partners:

GENETEC · milestone · Lumenera corporation · OnSSI Intelligent IP Video Surveillance · SONY · ALNET · exacq Technologies · MOBOTIX · AXIS COMMUNICATIONS · nuuo · VIVOTEK · ACTi

Augment Traditional Security Systems with Covert Cameras

Even if you've invested in a traditional video security system, adding at least two covert cameras will give you the complete unbiased picture of "what happens when you're not there." In fact, areas of your business not covered by traditional cameras are prime locations for internal illegal activity and the perfect location for covert camera coverage. Many of our covert cameras are wired for immediate use, and will simply plug in to your existing recording device. Other models are completely self-contained, and come equipped with a built-in DVR and battery so that you can easily spot check suspicious locations anytime and anywhere. And for unique applications, we customize! Call us today to build the perfect solution for you.

Great for:

- Upscale facilities not wanting visible cameras
- Detection of internal theft and shoplifting of high-value items
- Spot surveillance (such as cash registers and workstations)
- Home Protection (such as a nanny, babysitter, or maid)
- Law Enforcement (both fixed and body-worn application)

PIR Sensor Camera with DVR

Includes a 48db low noise color CCD imager, DVR and rechargeable lithium power cell. Video is stored on internal 128Mb memory which expands to 1GB SD card. Trigger recording by the 30' PIR sensor or the supplied RF remote control. With the power supply and overwrite feature recording can be indefinite.

Includes PIR camera, video & USB cables, remote control, bracket, charger/power supply, instructions and 1 year warranty.

PIR Sensor Camera with DVR without IR PIRC2-D **$229.99**
PIR Sensor Camera with DVR with IR PIRC2-DIR **$249.99**

Electric Box Camera

PERFECT FOR WAREHOUSES

High quality wide angle, day night, or super low light camera hidden inside unit. Many units come equipped with self contained battery power for hours of unattended run time. Also contains self contained DVR (model MDVR14) complete with motion detection, and high res recording to SD memory.

Comes with a one year warranty and a 30 day money back guarantee.

NEW! Digital Wireless Video Links

SEND WIRELESS VIDEO UP TO 600' LINE OF SIGHT WITH DIGITAL 2.4GHZ TECHNOLOGY

- MPEG4 video compression
- 2.4GHz wireless mode (up to 5Mbps)
- D1 real-time transmission
- 13 Channel adjustable
- Audio compression G.721

Based off of our best selling MVL10 series wireless video/audio link, our new MVL10D uses advanced digital technology to overcome common interference issues found in the 2.4GHz band. These systems can transmit digital video and audio signals up to 600 feet line of site and are ideal for home or small business applications. For longer range or commercial applications, please call one of our sales consultants for other options.

Comes with power supplies, instructions, 30 day MBG and 1 year warranty.

2.4 GHz Digital Video Link MVL10D **$299.99**

2.4 GHz Digital Video Link MVL10D4 **$749.99**

2.4Ghz Wireless Video Links

SEND WIRELESS VIDEO SIGNALS UP TO 700'!

- FCC approved
- Omnidirectional antennas
- Includes transmitter, receiver & power supplies
- Four channel operation

Comes with power supplies, instructions, 30 day MBG and 1 year warranty.

2.4 GHz TX/RX MVL10 **$88.99**

Weatherproof 2.4 GHz MVL10WR ~~$299.99~~ **$249.99**

NEW! Indoor Digital Wireless Video System

BUILT-IN DIGITAL TECHNOLOGY MINIMIZES VIDEO SIGNAL INTERFERENCE!

Our NEW wireless security system leverages the latest in digital technology to overcome common interference issues experienced by wireless analog systems - such as cordless phones, wireless routers, and other wireless devices. Systems include 4 indoor digital wireless cameras with 2-12mm varifocal zoom lenses allowing you to get the exact field of view you need. Cameras come pre-configured with included wireless receiver – so they are virtually plug and play. Systems also include our reliable MJPEG triplex DVR with a pre-installed and pre-tested 250Gb hard drive. Our security grade LCD monitor features digital VGA and standard BNC connections, and built-in speakers for audio surveillance. This is an ideal system for your home or small business applications – anywhere a fast and easy install is desired.

- Sony High Performance CCD Chipsets
- 420 lines of resolution, 0.2 Lux
- 2.4GHz (up to 5Mbps) range of up to 600 feet
- 13 Channel adjustable
- D1 real-time transmission
- Audio compression G.721

Comes with power supplies, cameras, DVR, Connecting cables, instructions, 30 day money back guarantee and 1 year warranty.

2.4 GHz Digital Wireless Video System SY307D **$1,799.99**

The Advantages of Digital Wireless

Wireless video links are essentially "invisible video cables", and a great option when running video cable is cost prohibitive, impossible or for temporary applications such as covert surveillance. Today, wireless technology has become commonplace in virtually every device producing or receiving information, such as laptops, bar code scanners, alarms … Consequently, interference is a huge concern when considering wireless video - especially when using analog technology that operates in the 2.4GHz range. Fortunately, digital wireless overcomes many of these interference challenges, and provides excellent quality and reliability.

Other Tips to Minimize Interference

Despite the many advancements of digital wireless, some of the old rules used to ensure seamless video transmission still apply. Whenever possible, keep transmitters and receivers away from high power wireless devices and RF emitting devices such as microwave ovens. Additionally, be conscious of obstructions. Any RF signal transmitted through an obstruction (such as walls, floors, vehicles, trees, terrain, etc) will experience a reduction in signal strength – so consider elevating both transmitter and receiver. Even inside of a building this can be extremely helpful, as most obstructions are six feet in height and below. In any case, high gain antennas will multiply signal strength and can be the difference in receiving a high quality signal.

If you would like further assistance in selecting the very best wireless digital solution, just send me an email at ***jake@supercircuits.com***

NEW! Digital Wireless Video Kits

AVOID INTERFERENCE WITH BUILT-IN DIGITAL 2.4GHZ TRANSMISSION

- MPEG4 video compression
- 2.4GHz (up to 5Mbps) range of up-to 600 feet
- D1 real-time transmission
- Sony CCD
- 420 lines of resolution, 0.2 Lux
- 13 Channel adjustable
- Audio compression G.721

This NEW wireless video kit uses the latest in digital technology to avoid interference from common devices such as cordless phones, wireless routers and existing analog wireless transmitters. Receiver displays all four camera at once in quad display. This is an ideal system for your home or small business applications, or anywhere a fast and easy installation is desired. For longer range or commercial applications, please contact one of our sales consultants for other options.

Comes with power supplies, instructions, 30 day MBG and 1 year warranty.

2.4 GHz 4 Camera Digital Video Link MVL10D-KIT **$899.99**

5.8Ghz Wireless Video Links

SEND WIRELESS VIDEO AND AUDIO UP TO 300' LINE OF SIGHT!

Our MVL58 video transmitter system will transmit video & audio up to 300 feet line of sight on the relatively uncrowded and ultra-efficient 5.8GHz frequency band. Transmitter / receiver pair features 4 user-selectable channels to minimize interference.

Comes with power supplies, instructions, 30 day MBG and 1 year warranty.

5.8 GHz Video Link MVL58 **$159.99**

Micro DVRs Pack Huge Recording Power

Although small in stature, most micro DVRs can record up to 720 x 480 resolution and 30 frames per second for hours at a time. Additionally, they can be set to record only when motion occurs - allowing them to remain idle for months on end until the moment is right. Evidence is typically stored on common SD cards making footage viewable on any computer and easy to share with police. Micro DVRs are an excellent choice for portable investigation or fixed applications with space constraints. We highly recommend models that record footage in .AVI format, which are viewable in common programs such as Windows Media Player, QuickTime and VLC Media Player.

Great for:

- Non-permanent internal investigations
- Spot checking for customer service – "mystery shopping"
- Law Enforcement (particularly body-worn applications)

Super Mini DVR with Built-in Camera

- Up-to 2GB micro SD card
- Records 2 hours of video
- Built in rechargeable Li-ion battery
- Records 30fps @ 176 x 144
- Weighs 0.63 oz.
- Measures 2.87" x 0.78" x 0.43"

One of the world's smallest DVRs. Includes built in camera and microphone. Records to removable micro SD memory cards. Rechargeable Li-ion battery runs continuously for up to 2 hrs.

Comes with instructions, cables, remote and a 1 year warranty.

Micro DVR with Built In Camera MDVR20 **$149.99**

Micro DVR Covert Camera System

- Records at 640 x 480 resolution @ 30 frames per second
- Play video back from unit, or download to computer via USB2.0 from SD card.
- 1.5 hours with built-in battery

Comes with DVR, earphones, case, battery, connection cables, software, USB cable, power adapter/charger and 3 year warranty.

High Res Digital Video Recording System MDVR15-2 ~~**$489.99**~~ **$429.99**

Color Camera MDVR15-CAM **$69.99**

MPEG-4 Micro DVR

- 640 x 480 max resolution
- DC12V power @ 200mA
- Rechargeable Li-battery (1200mA)
- 2.5 hours working battery time
- 8GB max memory
- MPEG-4 file formatting
- 30 or 15 frames per second
- 24 hrs of continuos recording time
- 1 channel of video and audio
- USB2.0 off loading

Comes with battery, adapter, belt holster, USB cable, connecting cables, 1 year warranty and 30 day money back guarantee.

MPEG-4 Micro DVR MDVR22 **$299.99**

LAW ENFORCEMENT FAVORITE

Mobile DVRs Feature Latest Technology

As the name implies, mobile DVRs are designed specifically for portable applications – most commonly automotive. In addition to the features & benefits of common DVRs, mobile DVRs offer additional features such as ignition triggered start & stop, GPS location overlay, sensor input for overlay of turn signals used, brakes, horn, lights, etc. Mobile DVRs are commonly used to monitor employee driving behavior and fleet activity, and provide an inexpensive legal advocate when questions ensue after a traffic accident or incident on that vehicle. Some advance units are capable of transmitting live video & audio over cellular networks and can even send you a SMS text when suspicious activity occurs.

Great for:

- Business fleet monitoring, such as shipping services
- Public transit & safety, such as buses and trains
- Law enforcement, including in-car surveillance

4 Camera CF Mobile DVR

SOLID STATE-ULTIMATE SHOCK RESISTANT DVR

- Records up to 4 cameras and 1 channel of audio
- 720 x 480 record video res
- 30 FPS recording in quad mode
- CF card to USB 2.0 adapter
- Records on standard CF card (not included)
- Duplex lets you record and play back simultaneously
- On screen menu display, time/date search modes, password protection and multiple alarm inputs
- Included wireless remote
- Operates on 9 - 35 volts

Comes with easy installation instructions and 1 year warranty.

Mobile CF Digital Video Recorder DVR29 **$399.99**

NEW! Advanced Solid State Mobile DVR

- Record capabilities: D1 @30fps 4 channels
- Built-in GPS capabilities
- H.264 compression
- 1 internal 2.5 SATA hard drive
- Digital zoom, X2 & X4
- Sensor inputs for speed and ignition

Comes with mounting bracket, connecting cables, lockable mounting bracket, GPS antenna, and 1 year warranty

Advanced Solid State Mobile DVR MDVR21SD **$599.99**

NEW! Single Camera Mobile DVR

MOBILE DVR FOR UNDER $120!

- Records 1 camera and 1 channel of audio
